

## 1. SCOPE

This specification outlines the pertinent electrical requirements of the RF output modulator which converts the FM video and FM audio signal into the RF signal for television standard transmission system.

## 2. GENERAL SPECIFICATIONS

2-1. Output frequency 2400~2483MHz (I<sup>2</sup>C PLL controller from outside)

2-2. Supply voltage 12v+/-0.2V

2-3. Consumption current 100+/-20mA

2-4. Operation and storage temperature 0-50°C

Conditions for guarantee humidity 85% or less

## 3. Test Conditions

3-1. Testing ambient conditions

defined as temperature of 25+/-2°C and humidity of 65+/-5% RH.

Note: That temperature of 5~30°C and humidity of 45-85%RH may be regarded as standard.

3-2. Unit setting conditions

(1). Picture --10 step wave signal 1.0Vp-p(82OHm load)

(2). Audio -- 1.0Vp-p of sine wave 1KHz

#### 4. Electrical Performance

##### 4-1. Video system characteristics

|       | Parameter                                      | Specification |     |     |      | Remark  |
|-------|--|---------------|-----|-----|------|---|
|       |  | min           | typ | max | unit |   |
| 4-1-1 | Input impedance                                |               | 1.3 |     | K    | Measure at 0.5-5MHz   |
| 4-1-2 | Input signal level                             |               | 1.0 |     | Vp-p | Load of 82ohm connected negative synchronous  |
| 4-1-3 | Modulation FP2480MHz<br>sine wave 300KHz 1Vp-p | 2             | 3   | 4   | MHz  | Superimposed sinuous wave.<br>(3.58MHz)is 20% of the step input   |
| 4-1-4 | Differential gain                              | 8             |     | 8   | %    | level measure under the APL of<br>10-90% differential gain of<br>demodulator unit is to be<br>compensated |
| 4-1-5 | Differential phase                             | -8            |     | 8   | deg  | -ditto-   |
| 4-1-6 | S/N  | 45            |     |     | dB   | Measure with respect to standard<br>demodulator output.   |
| 4-1-7 | Out level taper                                |               | 4   | 6   | dB   | Fp 2400~2483MHz   |

##### 4-2. Audio system characteristics

|       |                   |    |     |    |      |   |
|-------|-------------------|----|-----|----|------|---|
| 4-2-1 | Input impedance   |    | 1.4 |    | Kohm | Measure at 0.1-10KHz  |
| 4-2-2 | Modulation        | 35 | 40  | 45 | KHz  |   |
| 4-2-3 | Distortion factor |    |     | 3  | %    | Audoi input signal 1.0Vp-p 1KHz<br>modulation 50% (sine wave) video<br>input signal all black (sync.only)<br>use standard demodulator of inter<br>-carrier system.<br>De-emphasis(50 usec) is on. |
| 4-2-4 | S/N               | 40 |     |    | dB   | The same as 4-2-3   |

## 4-3. Output system characteristics

| Parameter | Specification.                               |          |          |          | Remark |   |
|-----------|--|----------|----------|----------|--------|---|
|           | min  | typ      | max      | unit     |        |   |
| 4-3-1     | Video carrier frequency                      | 50       | fp       | +50      | KHz    |   |
